

Enlightened Solar

Proven technology delivers the most reliable, high-performing system to provide the best return on your investment. Enphase is the smarter choice in solar.

10,000,000+ microinverters shipped, 430,000+ installations

More energy, safest solution

- Shade, dust, debris? No problem. Each panel operates independently.
- Starts earlier and stays on later for a longer solar day.
- No high-voltage power on your roof.

Smart system, ready for tomorrow

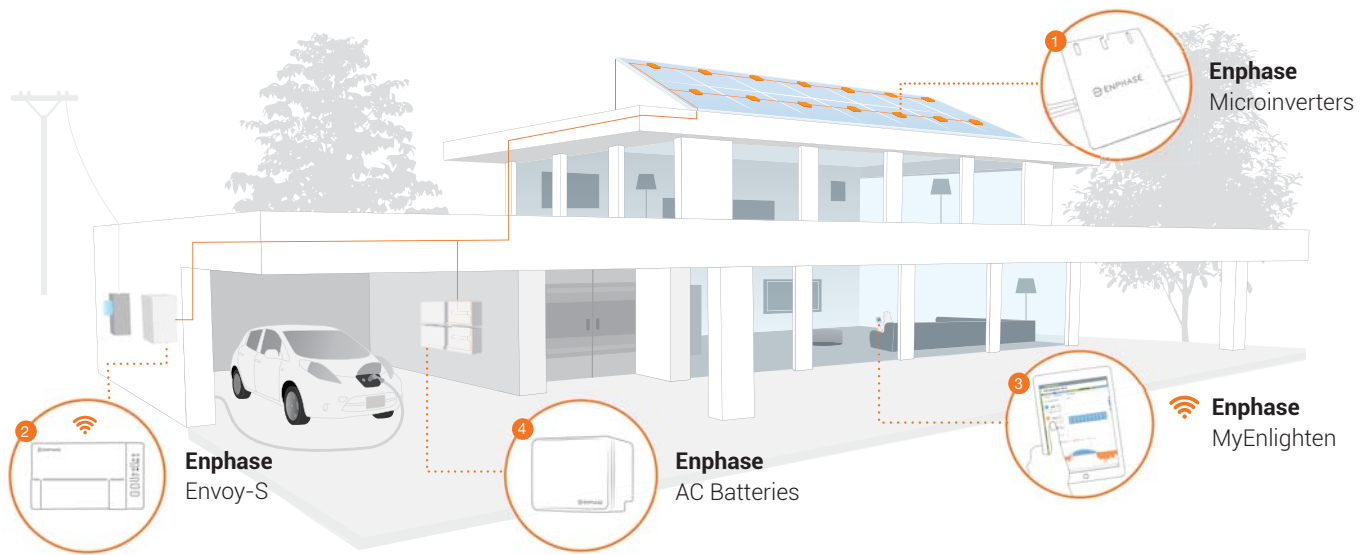

- Flexible design to expand as your needs grow.
- Easily add new features like consumption monitoring and storage.
- Remote updates to maintain regulatory compliance.

Seeing is believing with Enphase MyEnlighten™

MyEnlighten connects you to your Enphase System. Monitor your system, track energy production, and share with family and friends, from anywhere, with any web-connected device.

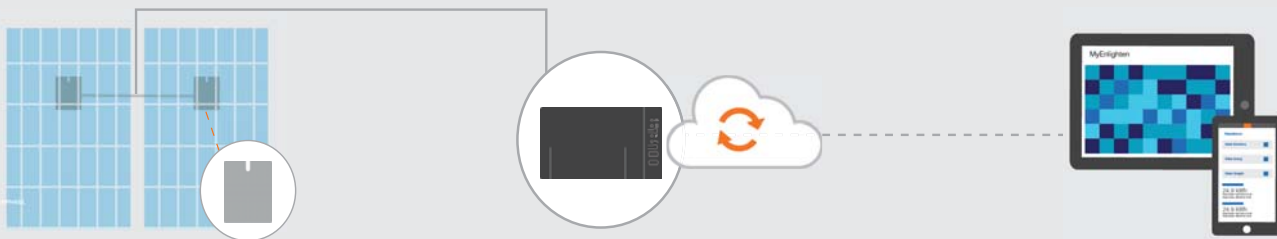

Enphase Home Energy Solution

- 1 Generation**
Enphase Microinverters collect power from your solar panels and transform it into AC power you can use.
- 2 Control**
Enphase Envoy is the brains of the system, collecting data, monitoring and constantly communicating.
- 3 Management**
Enlighten Software allows solar professionals and homeowners to monitor and manage the system.
- 4 Storage**
Enphase AC Batteries store excess energy so you can use it when you need it.

How microinverters work

Enphase **Microinverters**

Located beneath each panel, microinverters convert power right at the source, maximizing energy harvest without high voltage power on your roof.

Enphase **Envoy™**

The brains of the system, Envoy connects to microinverters and connects to the Internet, enabling system monitoring and remote maintenance.

Enphase **Enlighten™** Software

Enlighten provides insight to the system via any Internet-connected device. Includes tips to cut energy usage and social media sharing options.
