

Nexia™ Home Intelligence Background Info

Nexia™ Home Intelligence is today's leading home automation system that is setting the industry standard by offering the best technology, supporting leading house brands and allowing consumers to efficiently run their home from anywhere. Nexia Home Intelligence is designed for every lifestyle offering users flexibility to manage the home via any smart phone, tablet or computer using Z-Wave technology. You simply customize your system based upon your individual needs and budget, and it's completely scalable with your home and technology as they grow.

About Nexia Home Intelligence

- Nexia Home Intelligence offers simple remote access to manage and control products in your home – from locks and lights to thermostats, cameras and small appliances – via the web from your smart phone, tablet or computer.
- Nexia Home Intelligence uses Z-Wave technology, a scalable platform that allows products to speak to each other and is intentionally designed to adapt to changes in technology. Z-Wave has become the universal standard technology used in home automation by leading brands and manufacturers.
- Nexia Home Intelligence works with leading brands such as Schlage, Trane, American Standard, GE, and Linear to connect you to products in the home.
- With all of its remote control capabilities, Nexia Home Intelligence offers a new way for you to run your home. The system allows you, as a connected consumer, to manage your home with the mobile app, when you're traveling or on-the-go. You'll have peace of mind knowing that you can check in on your home at any time or receive alerts about the happenings in your home that you preset ahead of time. Receive as many or as few alerts as you'd like.
- The Nexia Home Intelligence Bridge can hold more than 200 devices at the same time, meaning your system is highly adaptable and will grow with your home as technology changes over time.
- For more information, please visit www.nexiahome.com

Key Benefits & Features

- Nexia Home Intelligence allows you to create a smarter home using connected technology so you can:
 - Control your home wherever you are, whenever you want. For example, imagine being able to adjust the temperature, view your home via cameras and let someone in when you can't be there from your smartphone.
 - Automate your home to make it behave the way you want. Imagine coming home from work and having your lights and thermostat adjust as you enter inside.

- Receive messages and alerts from your home via text or email no matter where you are so you are always in the know. For example, receive a text alert when someone unlocks the door or when the temperature is out of range.
- For second homeowners, Nexia Home Intelligence offers peace of mind in knowing you can monitor and manage your home from afar. You can control lights and climate to your pet's comfort and even grant access via customizable access codes for guests or pet-sitters that come in and out for added security.
- The Nexia Home Intelligence system is scalable, allowing you to affordably manage your home in ways that best fit your lifestyle. You can expand on it anytime you want by adding compatible components like cameras, locks, lighting and small appliance controls, thermostats and sensors, without added installation or service costs.
- Nexia Home Intelligence offers parents and pet lovers alike some well-deserved relief. In addition to being able to check in on your kids or pets remotely via cameras, you can also receive alerts, when the kids get home from school, if no motion has been detected in the house and easily let in help in case of an emergency.

Pricing and Availability

- Nexia Home Intelligence is just \$9.99 a month no matter how many devices you use and there are no long-term contracts or cancellation fees – a small price to pay for the complete control of your home. Plus you get a one-month trial period.
- The hub of the Nexia Home Intelligence system is the Nexia Bridge, retailing for \$59.99. The homeowner can choose compatible hardware that connects to the bridge from a variety of leading brands at affordable prices.
- Nexia Home Intelligence is available for purchase at www.nexiahome.com, as well as on our [Amazon Home Automation page](#). You can also go through your local Trane and American Standard dealers and many leading homebuilders like Lennar, Meritage and Pulte. Nexia™ Home Intelligence is easy to set up and customize for your home and needs. For additional help, our US-based customer support center is available to assist you during set up.

What is Z-Wave?

- Z-Wave is a next-generation wireless ecosystem that lets all your home electronics and other home hardware talk to each other.
- Compatible Z-Wave devices communicate wirelessly with each other through your Nexia Bridge. The bridge simply plugs into your router and connects to your Broadband Internet.
- As Z-Wave has fast become the universal standard technology used by leading home brands, including Schlage, Trane, American Standard, GE, and Leviton, Nexia Home Intelligence is built with this technology so you can trust in the ability to grow with your system down the road.

What is home automation?

- Home automation uses technology to make your life simpler, safer or less expensive. A home automation, or connected home, system connects electronic home products to Internet-enabled devices so you can access them remotely.
- With an automated home you can greatly reduce energy costs by dimming lights and changing the temperature when you're away, as well as unlock the door remotely for guests, and sense activity in or around your home from anywhere so you feel safe and secure.
